

Skisseboken

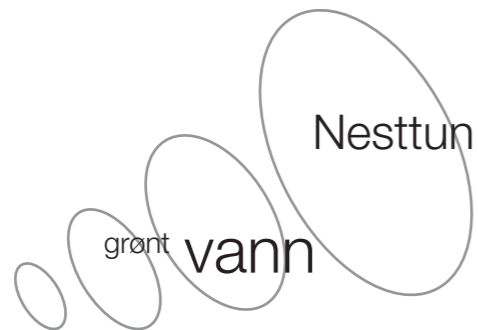

Vedlegg 2: Skisseboken
Neste stopp er Nesttunnelven!
Transformasjon av Nesttun sentrum
med fokus på blågrønner strukturer
Masteroppgave av Christine Margrethe Sundt
og Hanne Lien Bjelke

Denne boken er laget for å vise en del av skisseprosessen og tankene bak resultatet av masteroppgaven. Vi har vært opptatt av å bruke forskjellige skisseringsmetoder og utforske ulike teknikker for å finne løsninger til vårt design: Digitale tegninger og -modeller, fysiske modeller og håndtegninger, vannforsøk, samt kombinasjoner av disse, har blitt brukt. For oss har prosessen i seg selv vært viktig, og ikke minst veldig gøy!

Christine og Hanne

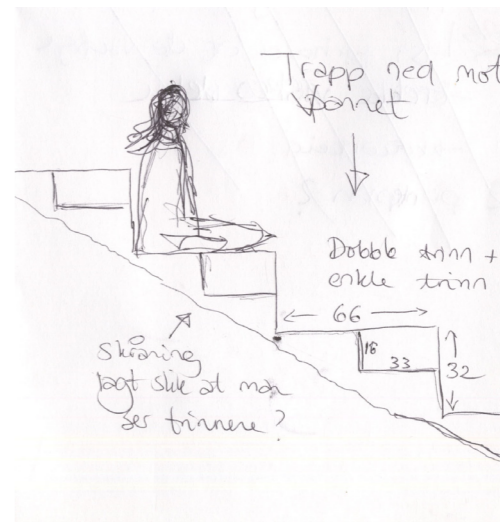

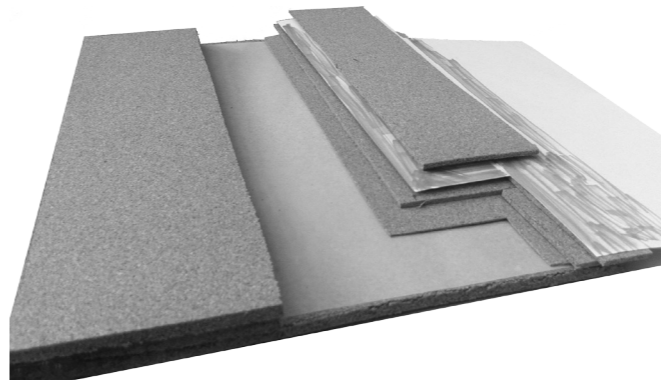

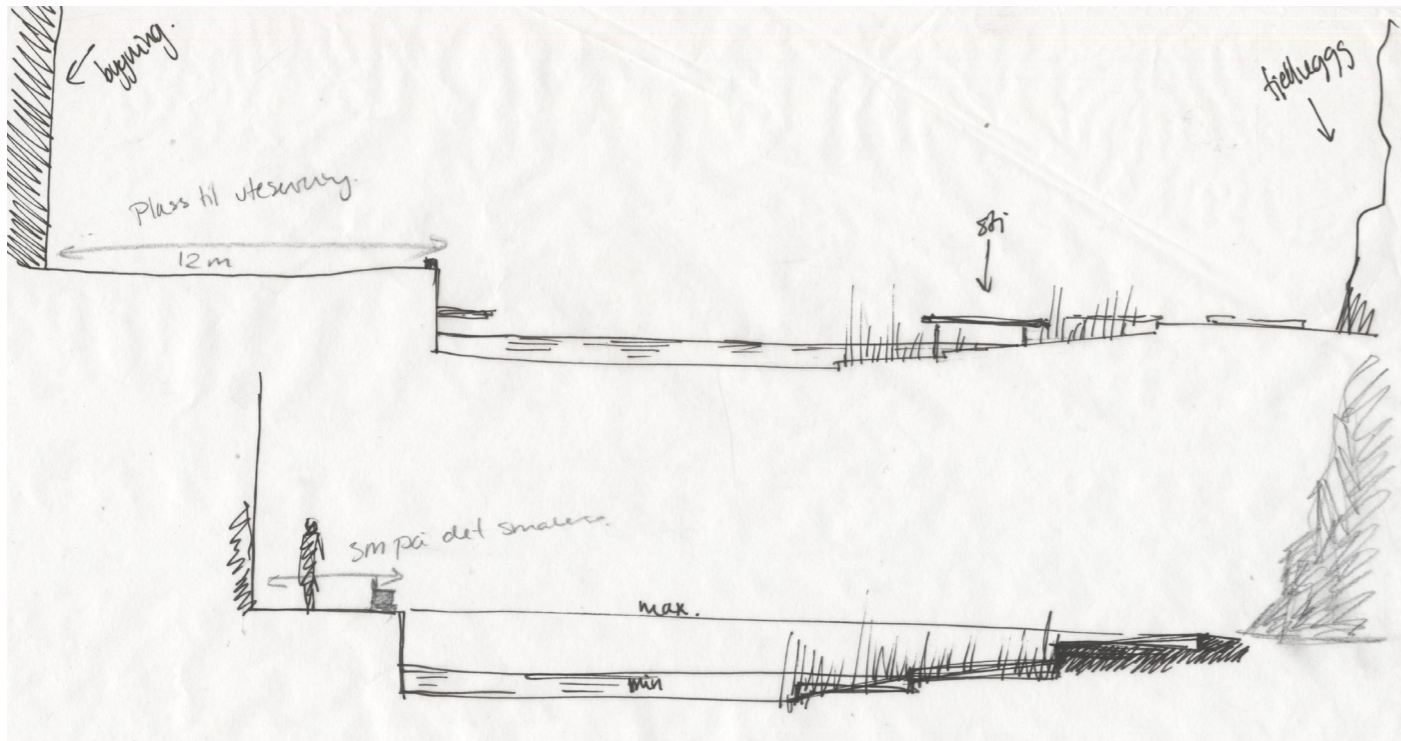

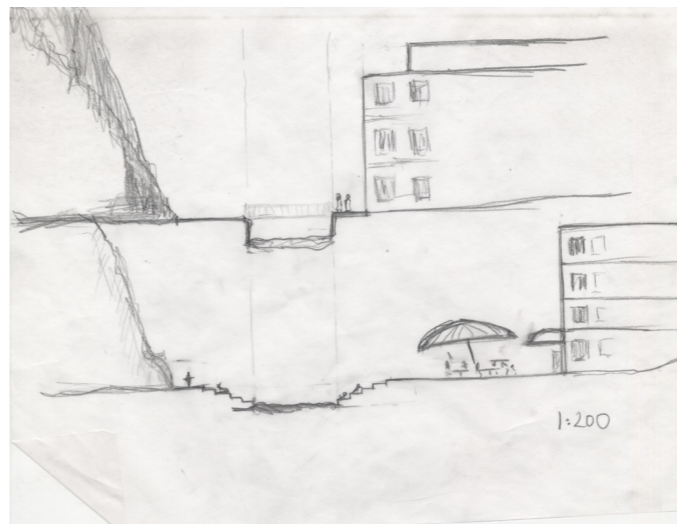

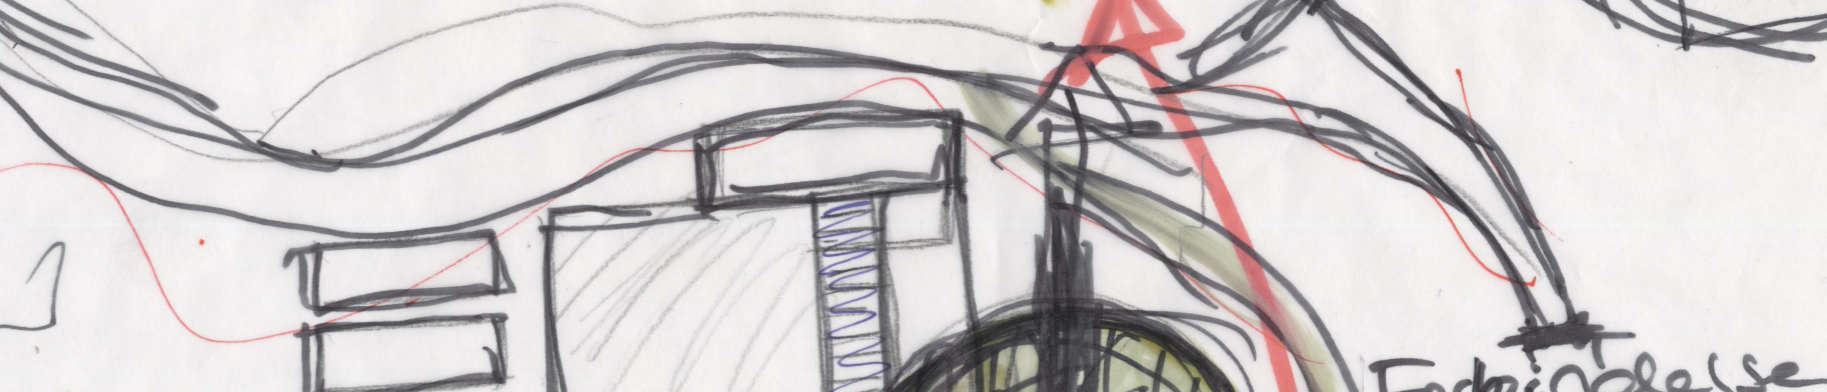

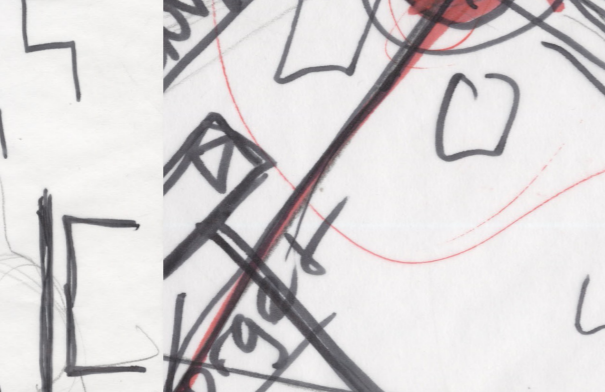

HVEM KOM FØRST?... ELVEN
ELLER PARKERINGSHUSET?

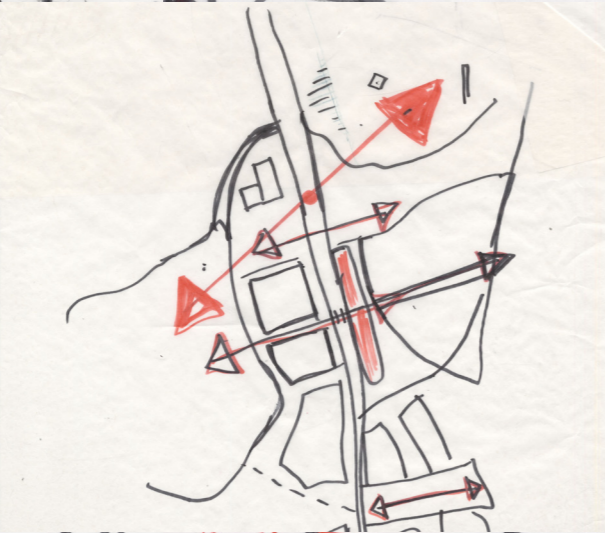

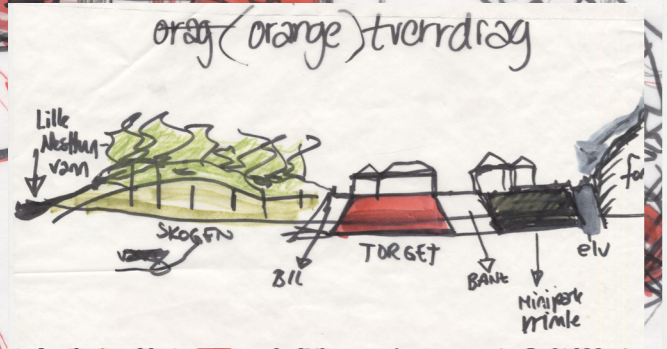

Ulike måter å komme nær vannet

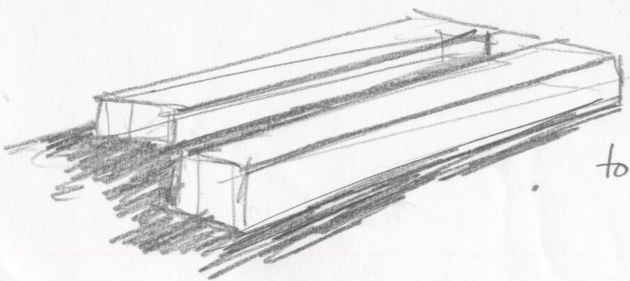

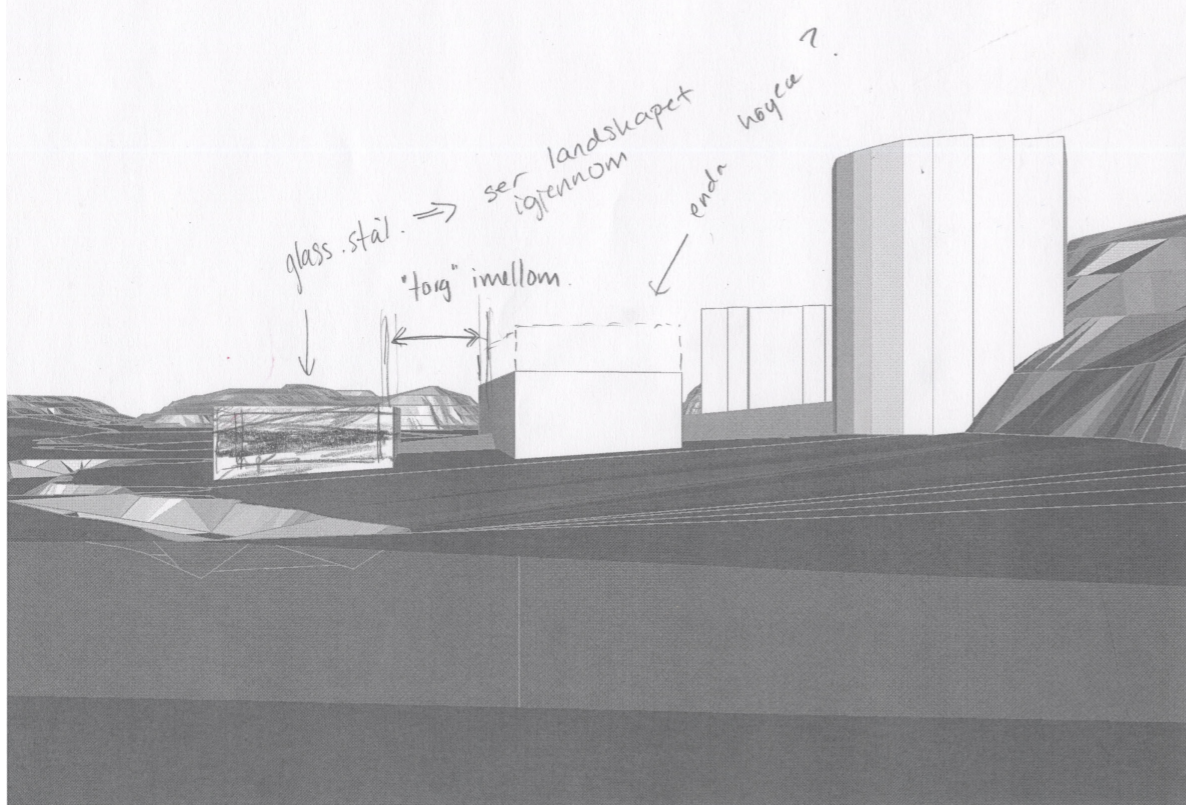

Forbindelser i sentrum

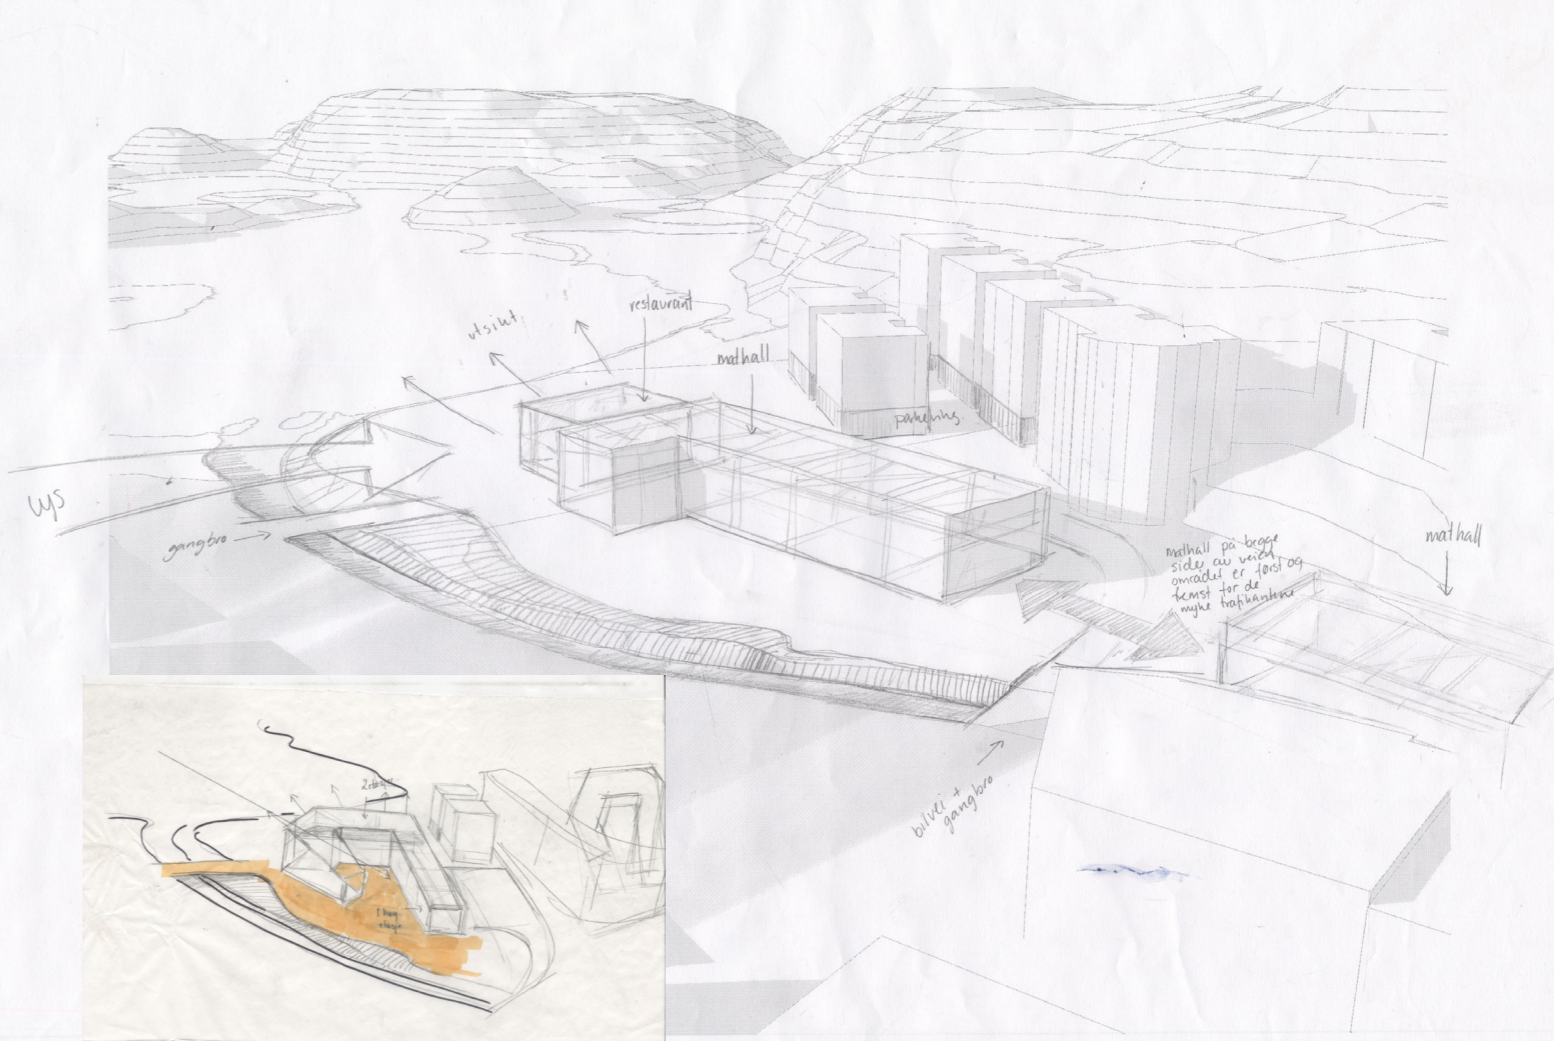

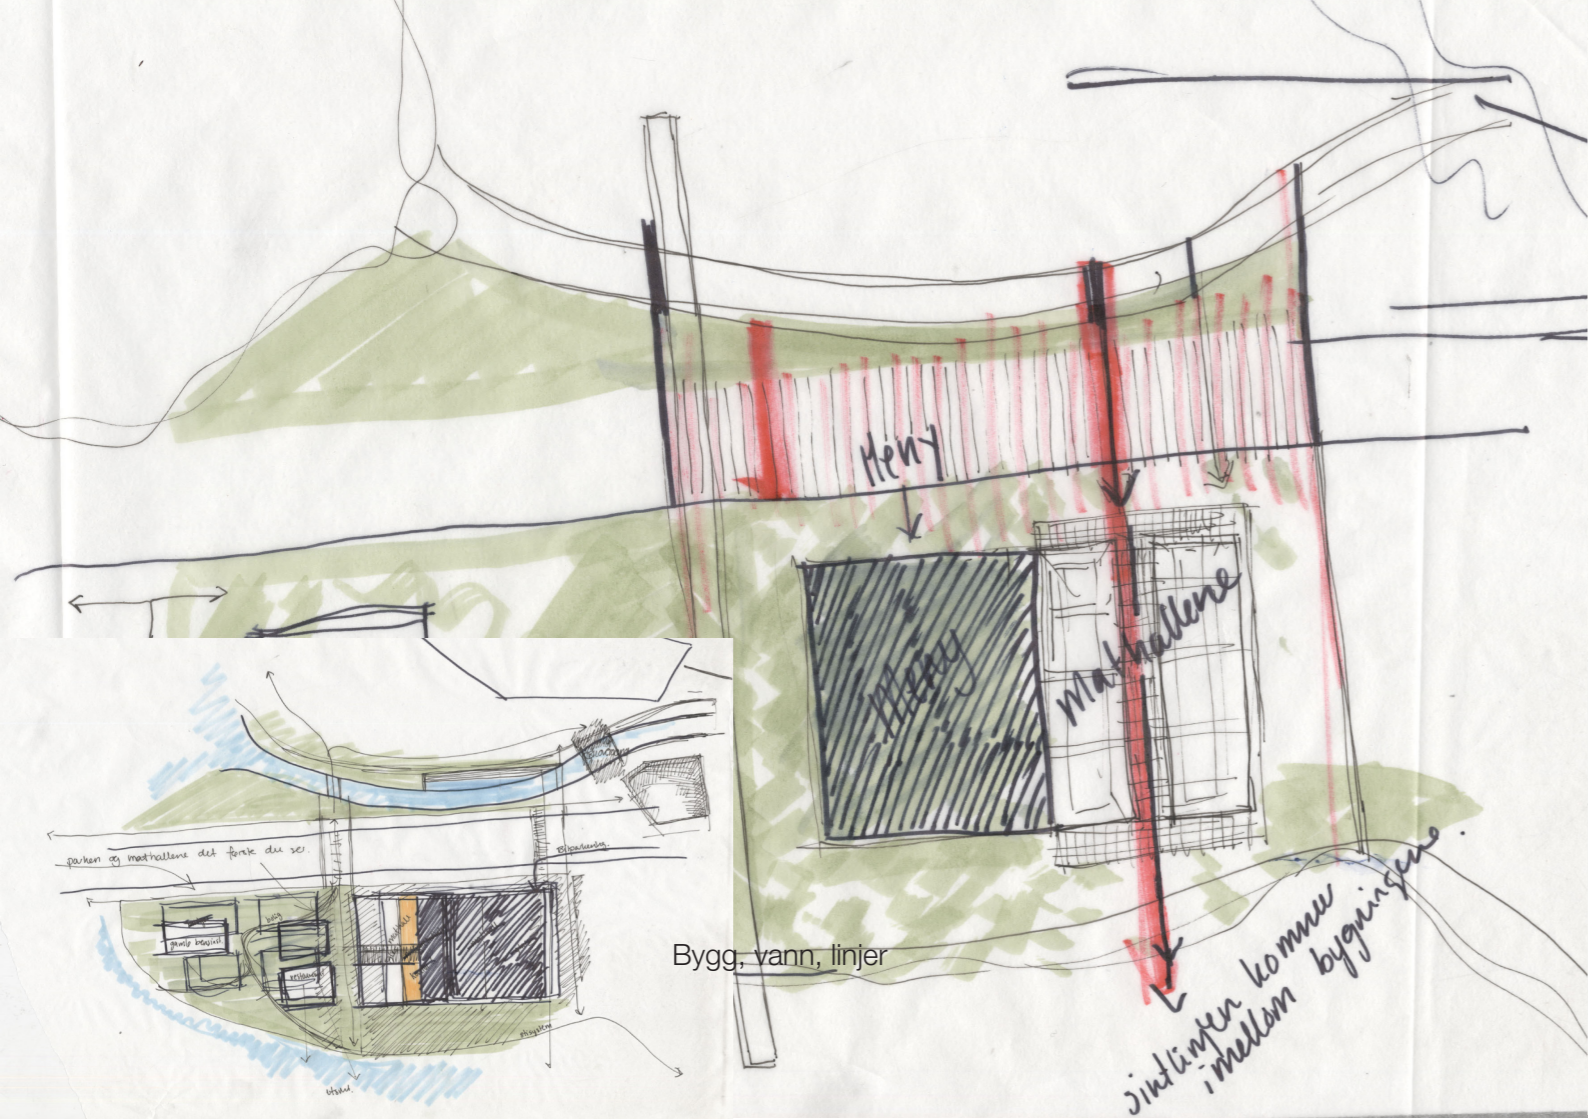

3

Plassering av bygg

to line bygningsmasse

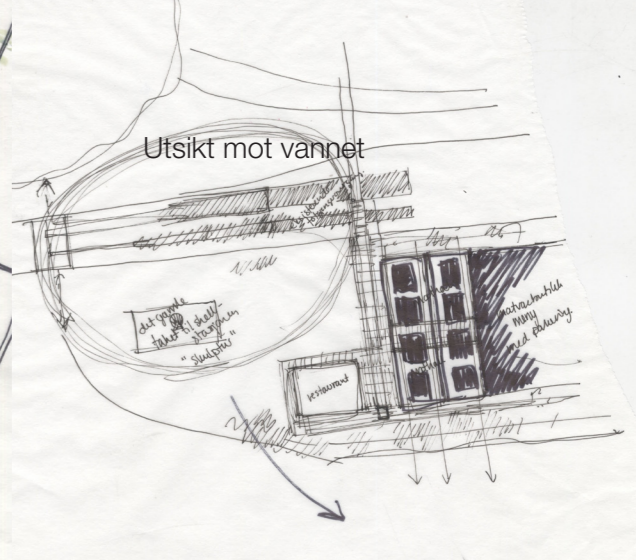

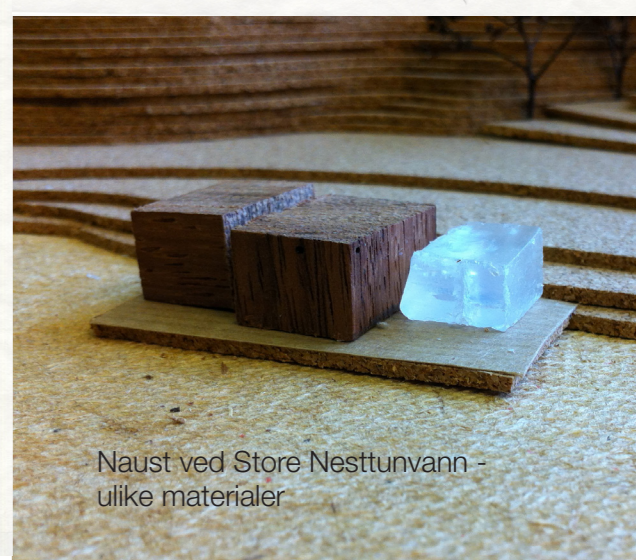

Bygg, vann, linjer

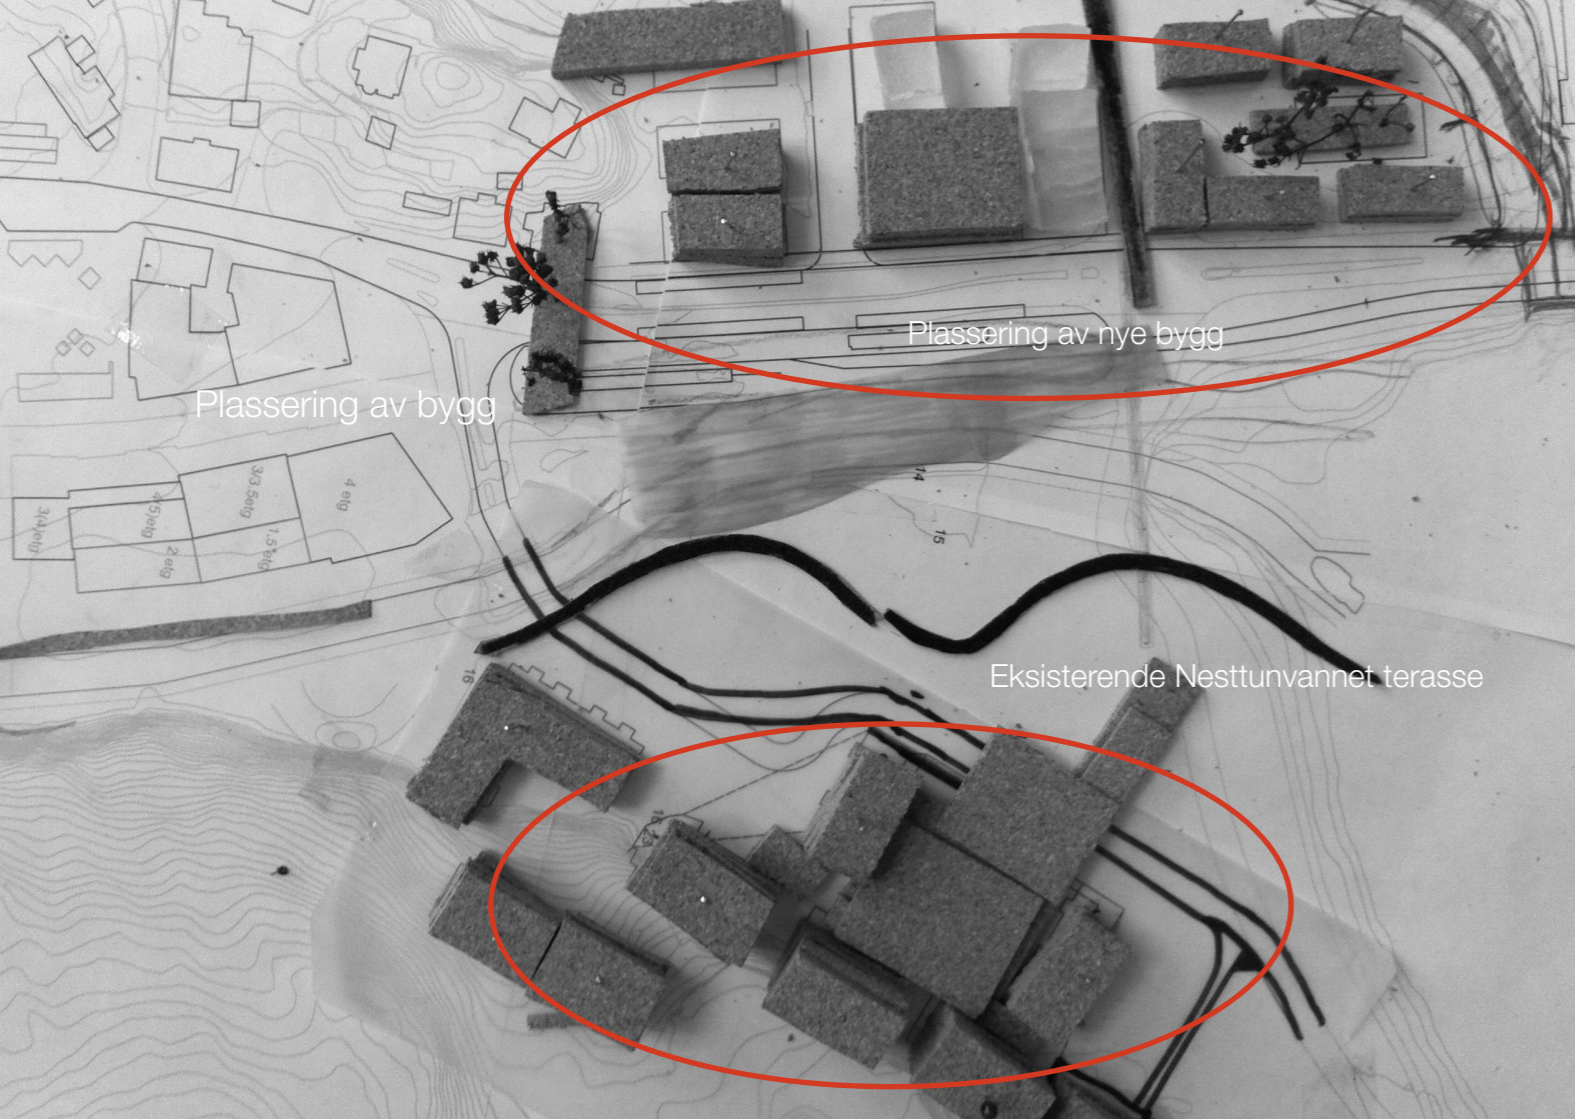

Størrelser og volum

Utsikt mot vannet

Naust ved Store Nesttunvann - ulike materialer

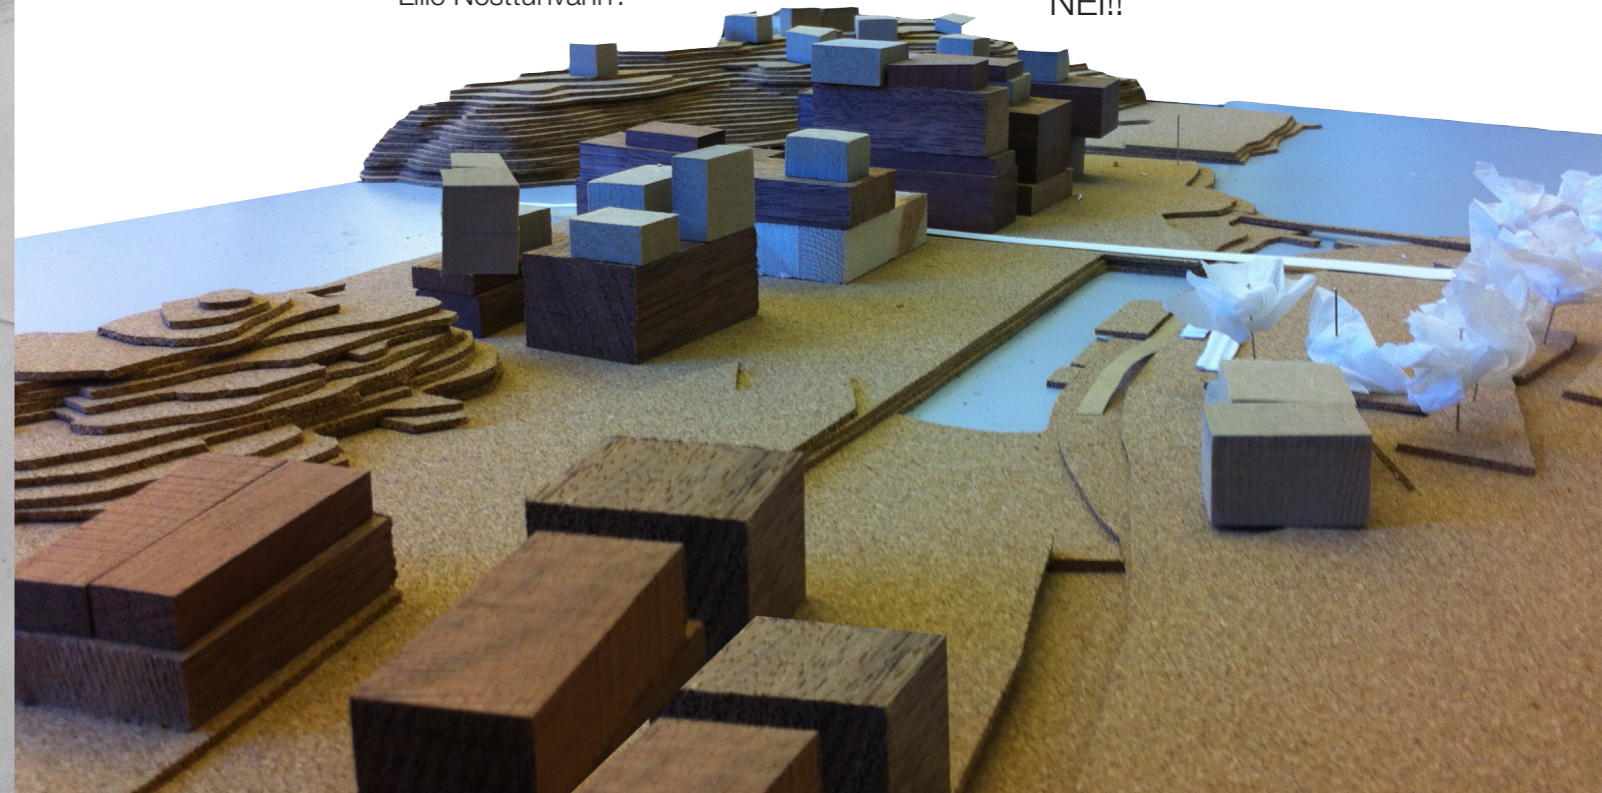

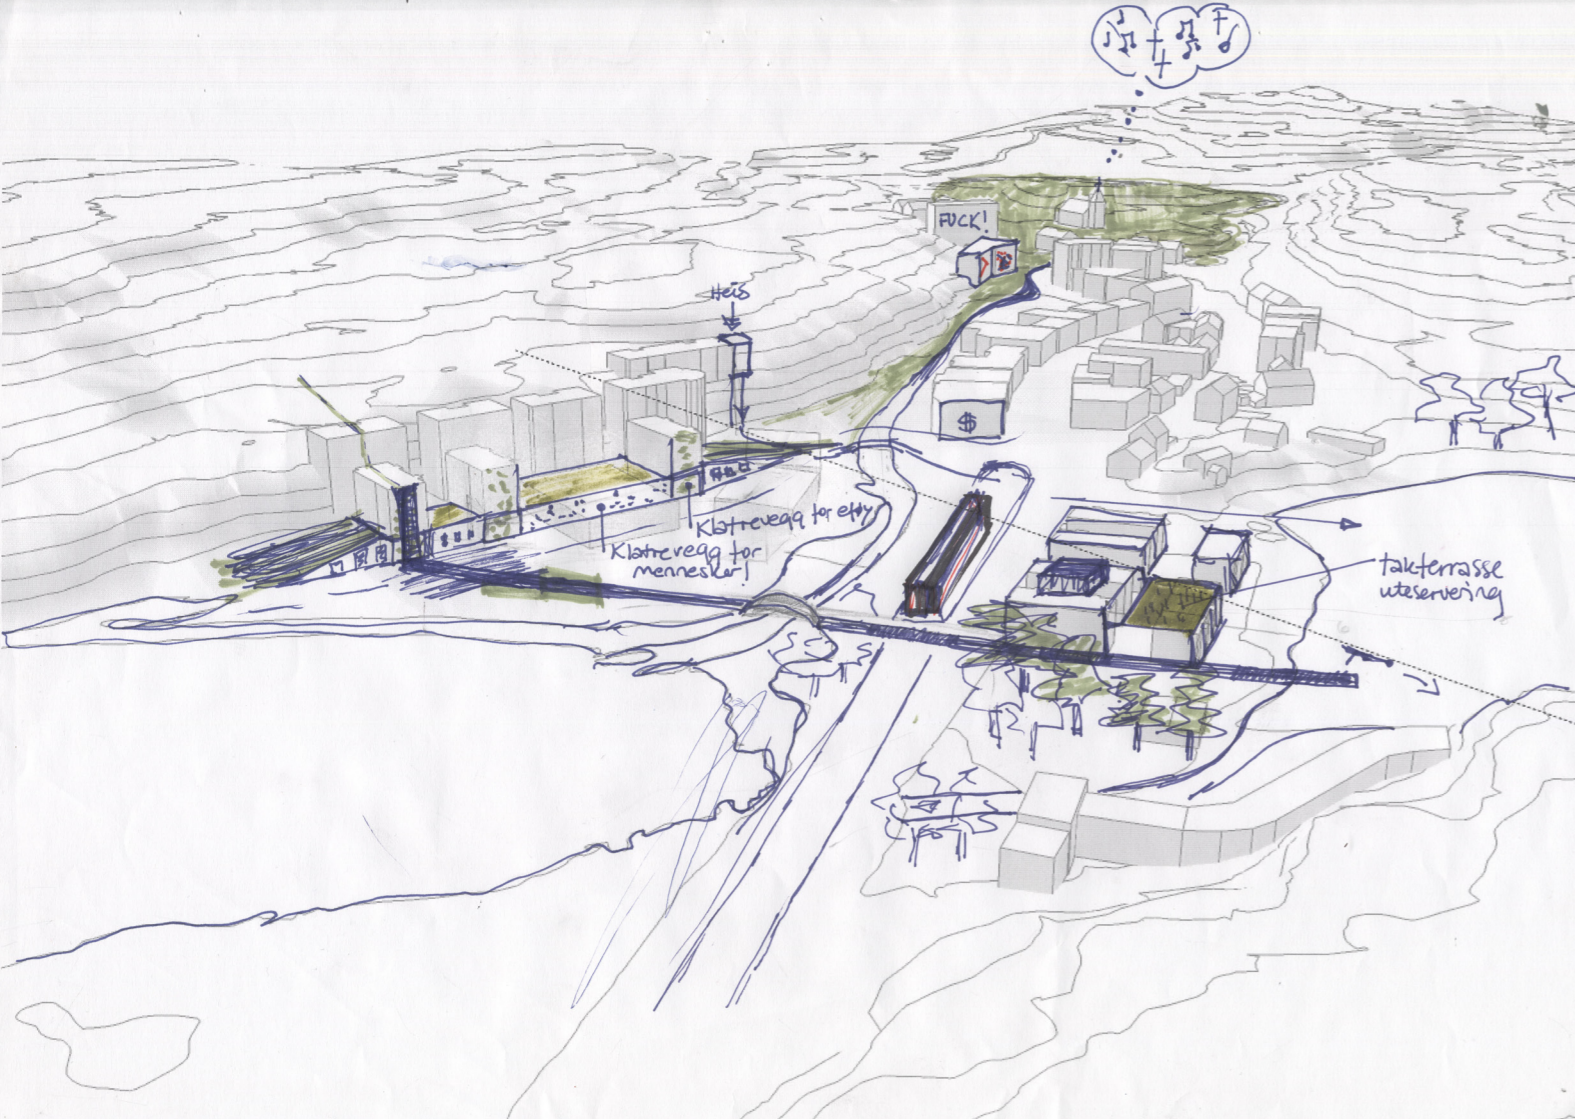

Hvor høyt skal man bygge?

Størrelser og volum

Høyhus og leilighetskomplekser ved
Lille Nesttunvann?

NEI!!

Kontraster

Vannforsøk og vannbesøk

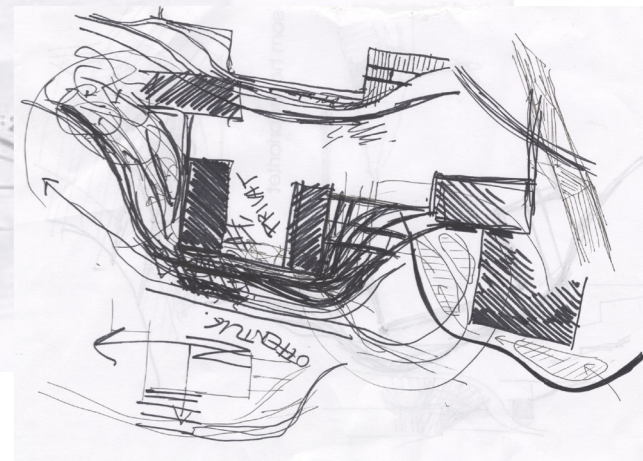

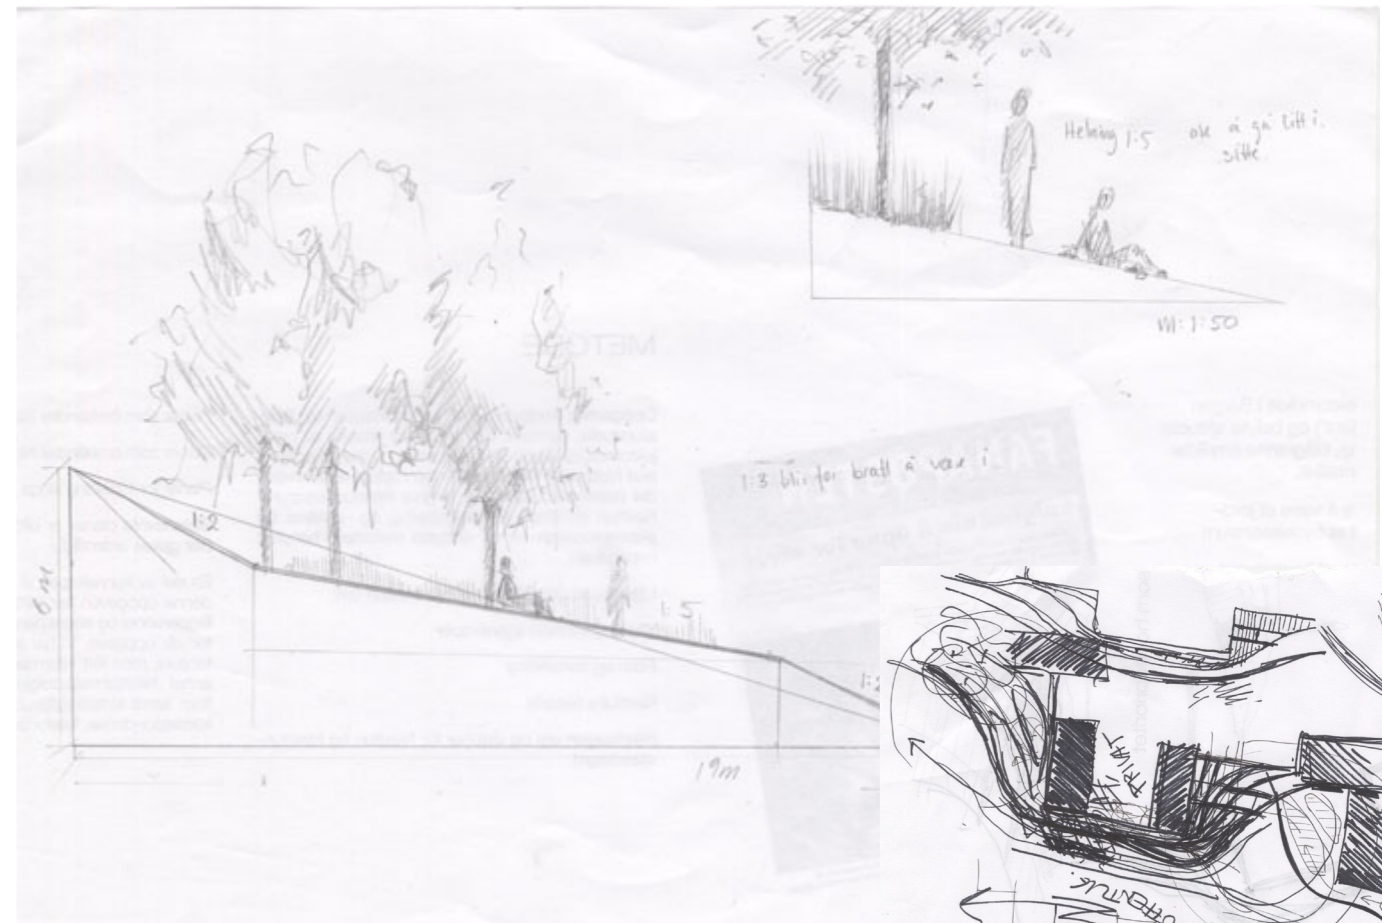

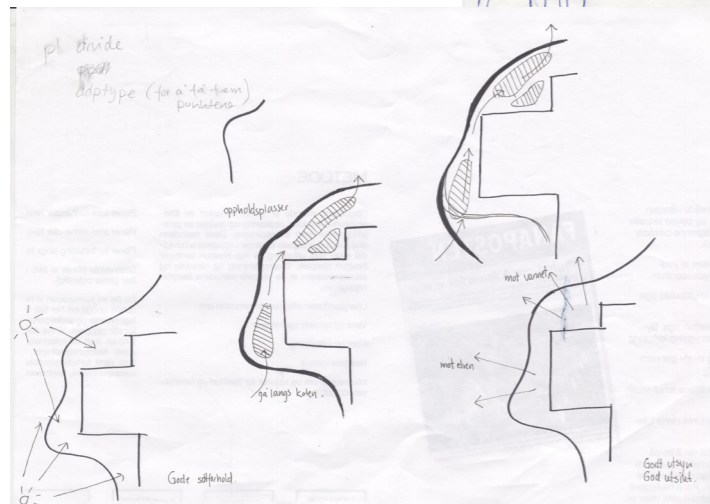

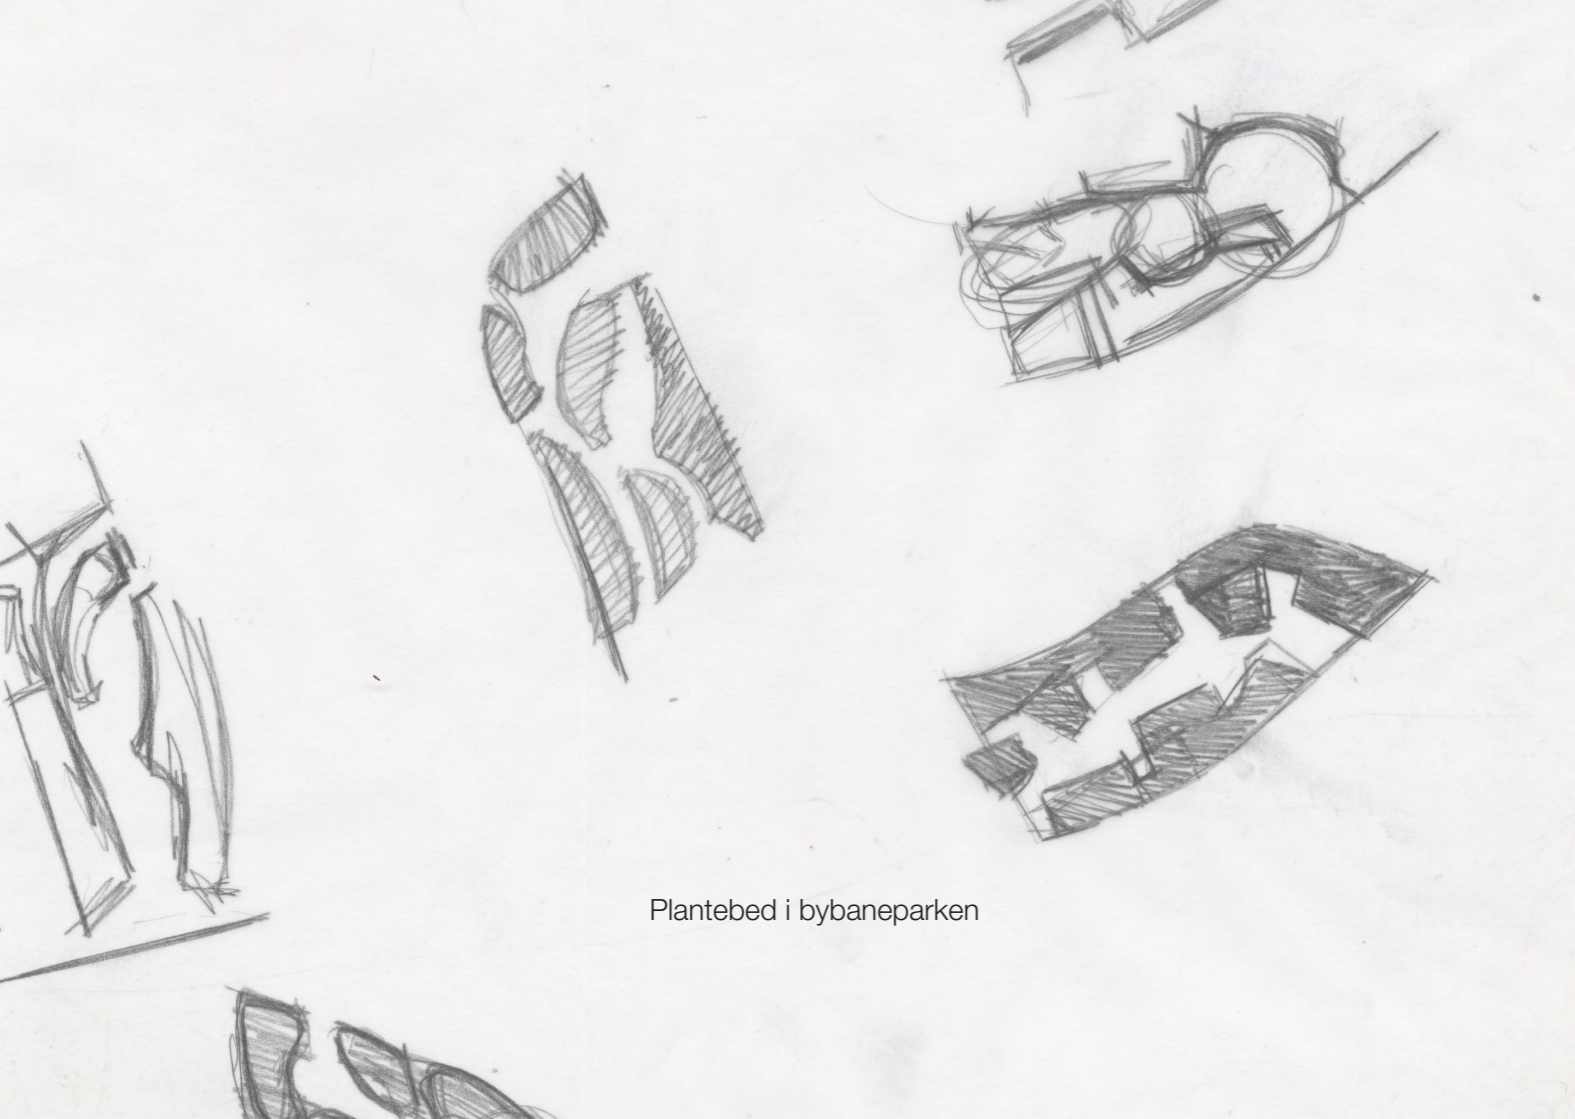

Fart fart fart..... og rytme

Form og struktur

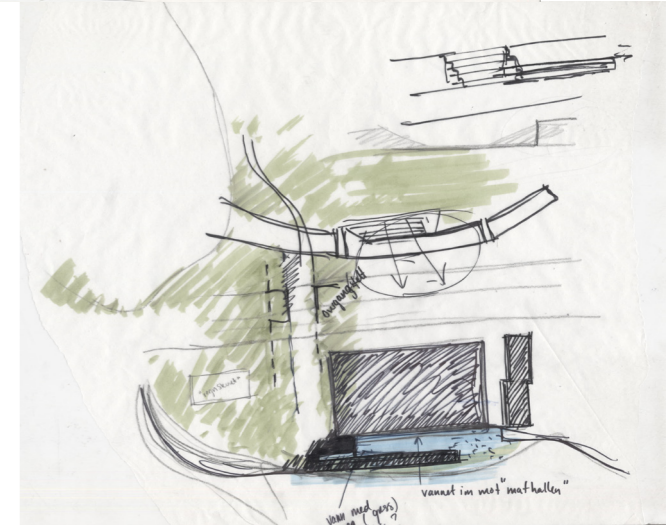

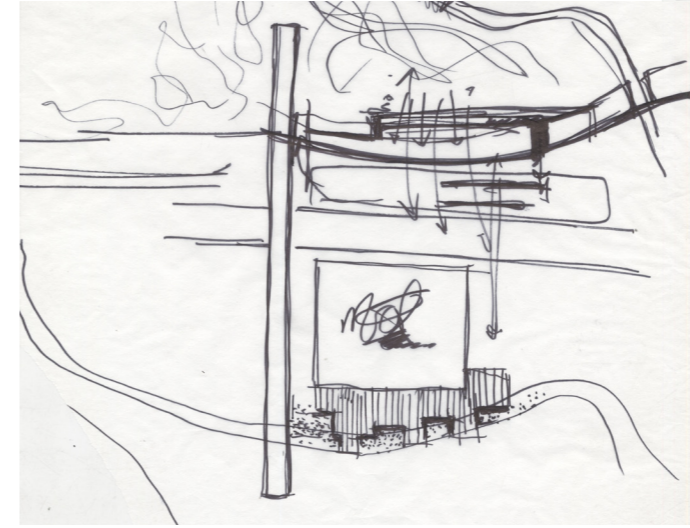

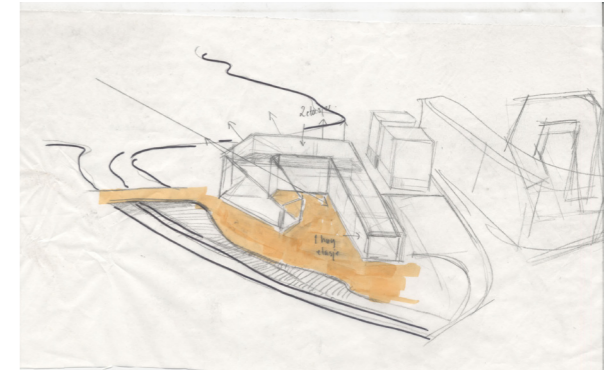

Utforming av helning/buffer mot nye/eks leiligheter

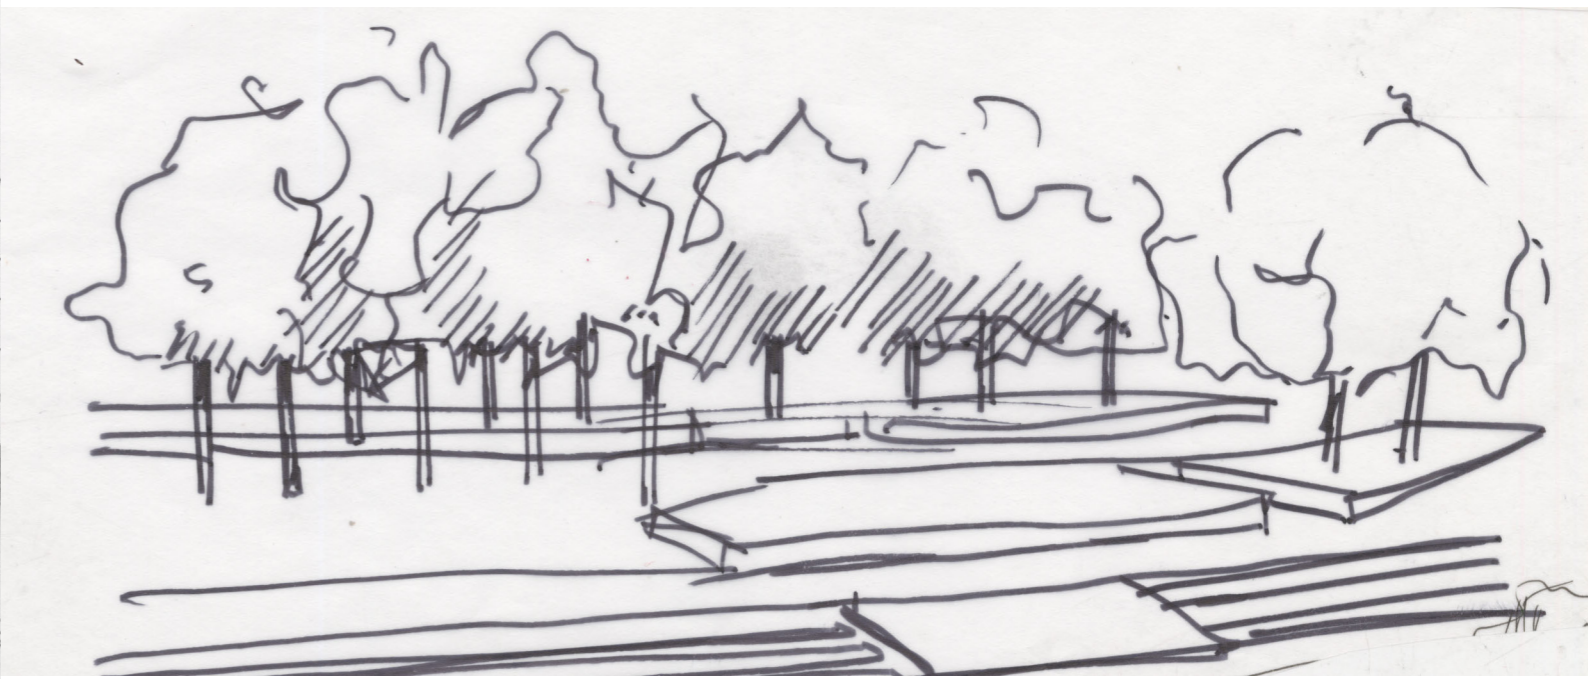

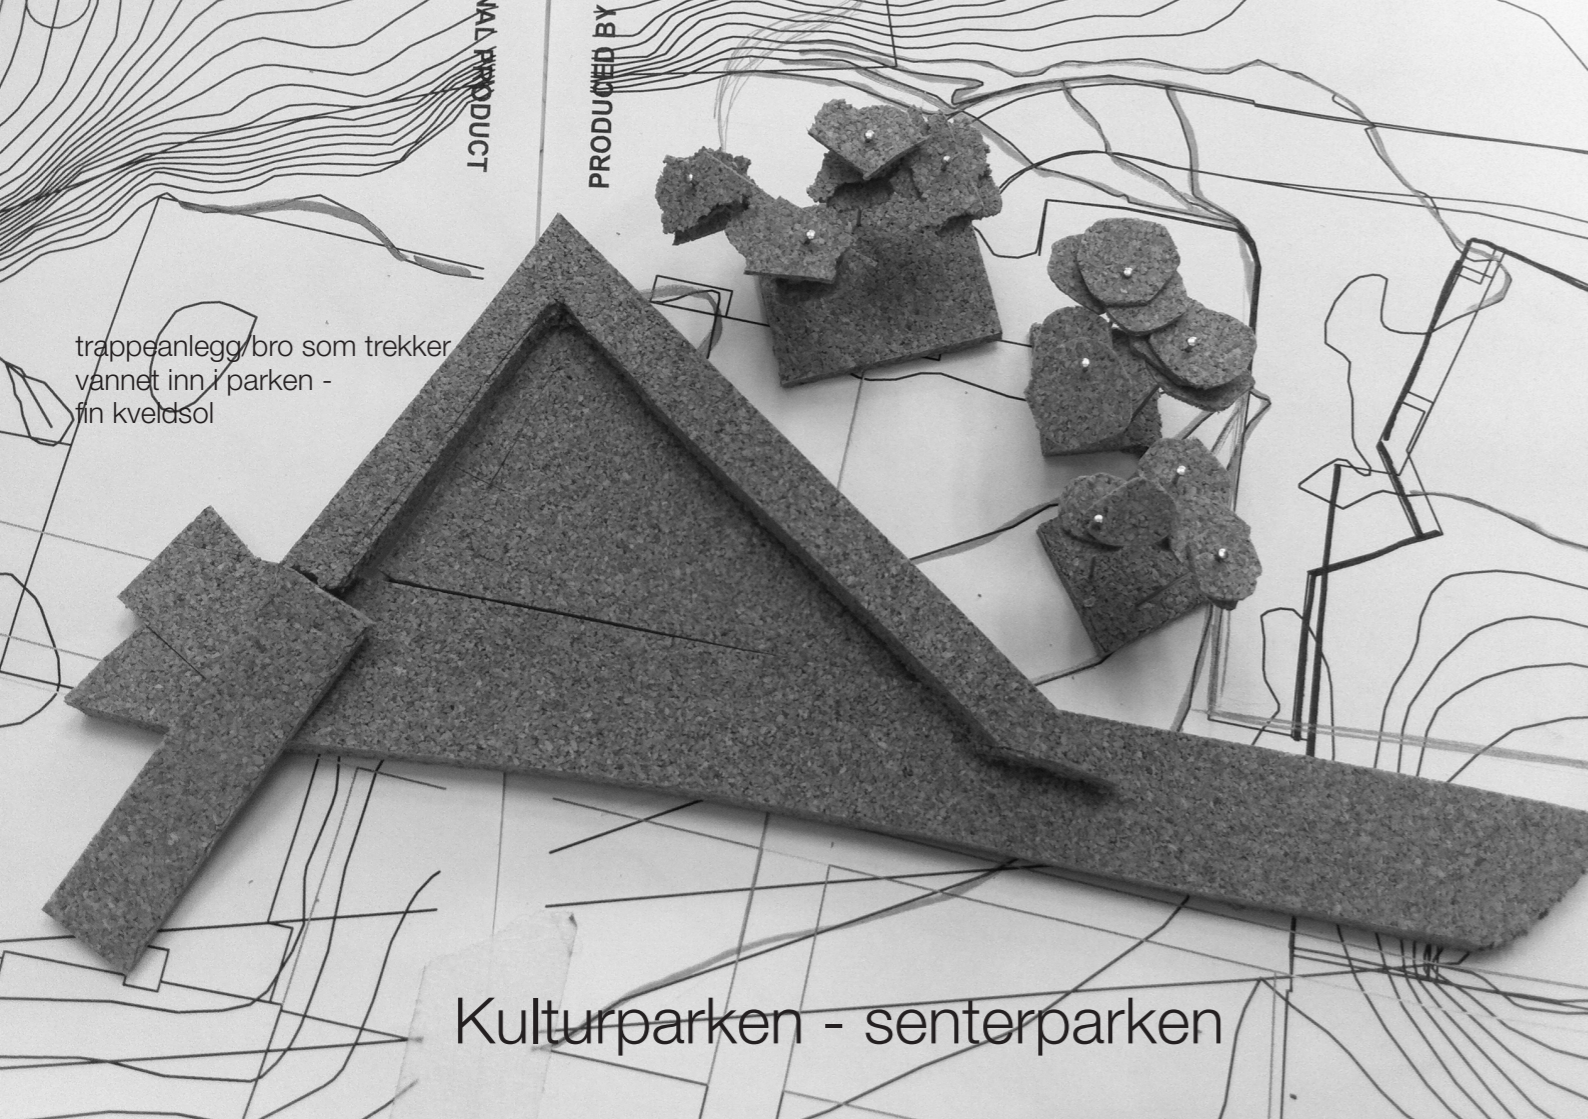

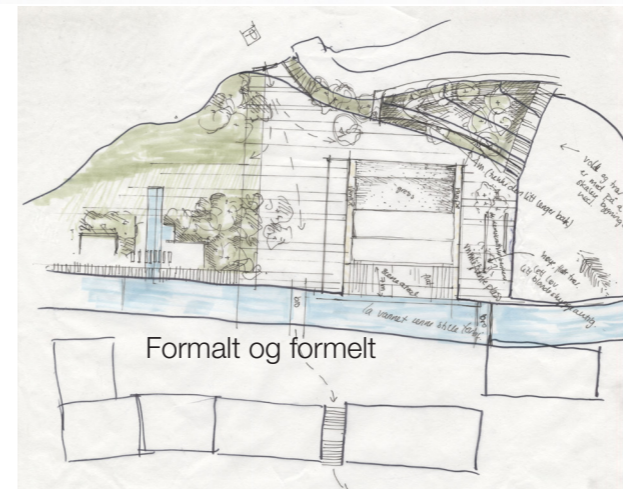

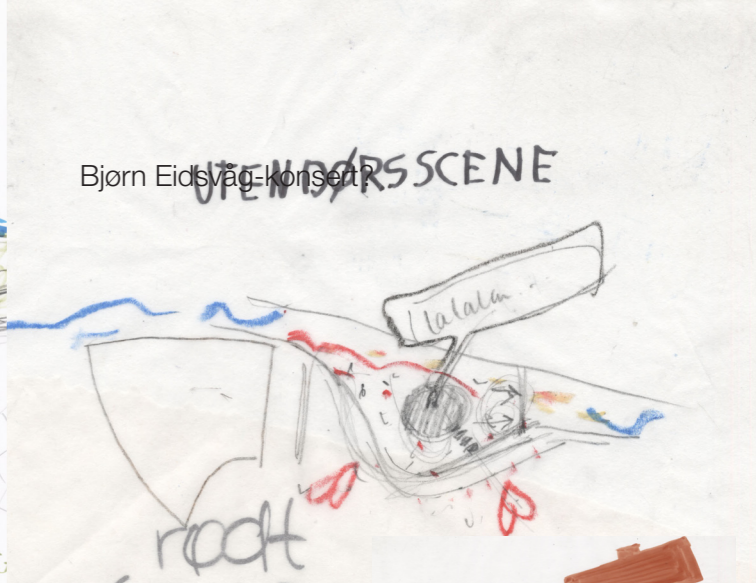

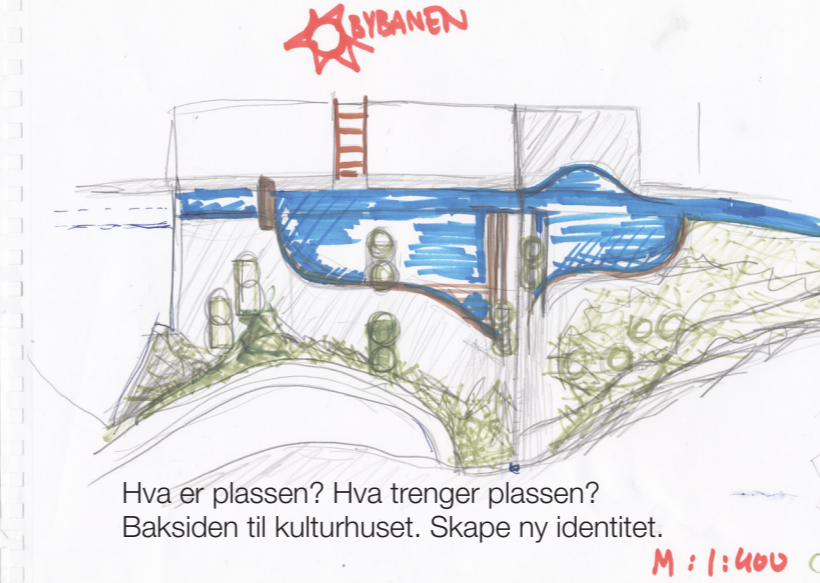

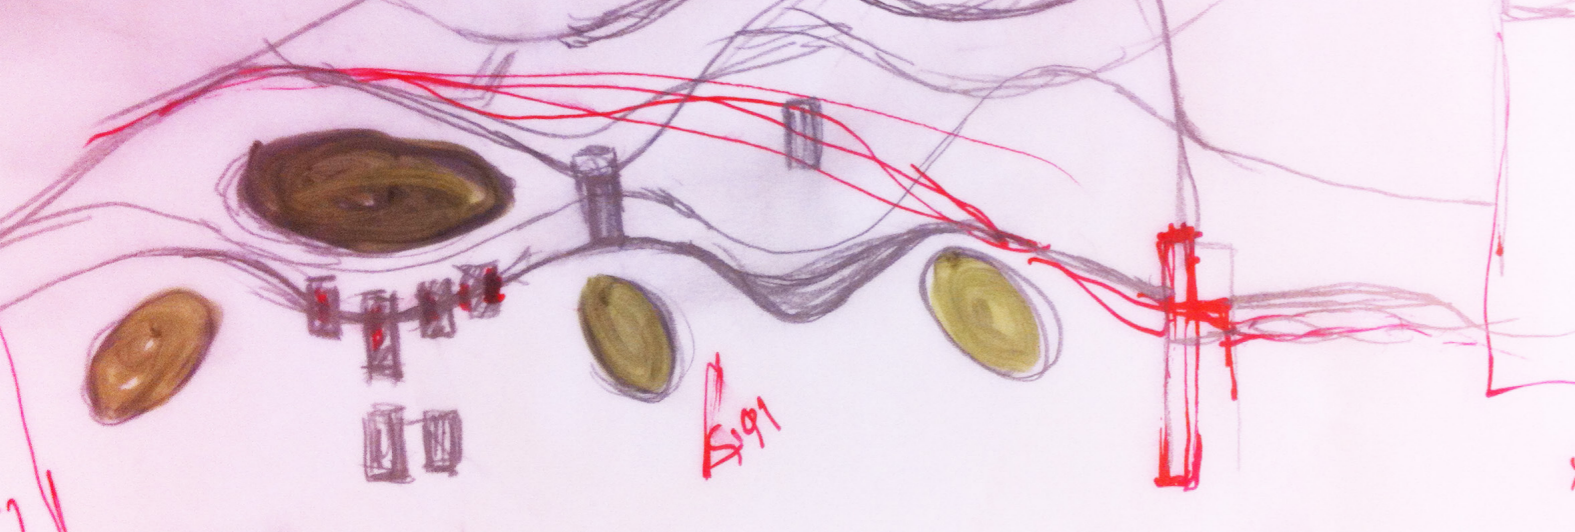

Plantebed i bybaneparken

Bryggekant ved mathall

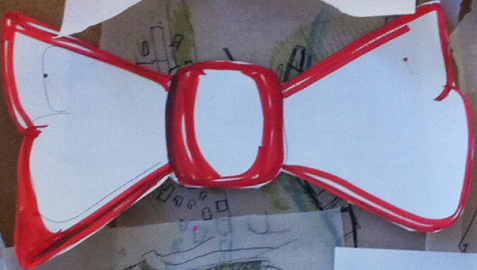

Public Utility & Group
[Illegible text]

Toilet
